msi

The MSI® Z87 MPOWER is the motherboard for those living on the edge. No other motherboard is tested more extensively and over a longer period of time than MSI's Z87 MPOWER and that translates directly to better stability and higher overlocks for you. When overclocking, you don't want a single component to limit you.

ENHANCED THERMAL DESIGN

The new Z87 MPOWER comes equipped with the most impressive thermal design to date. The massive heat sink has been designed and tested to be compatible with any air or liquid cooler and SuperPipe technology maximizes the heat sinks efficiency.
